Did You Know to Do This?

An **OWLWorks** Project
Presented by Michele Jackman

Did You Know to Do This?

You're supposed to use the soda tab to hold your straw.

Did You Know to Do This?

You're supposed to spread the edges of your ketchup cups for easier access.

Did You Know to Do This?

You're supposed to store peanut butter upside down so that the oils distribute evenly.

Did You Know to Do This?

You're supposed to push in the tabs on either end of the aluminum foil box to prevent the roll from coming out.

Did You Know to Do This?

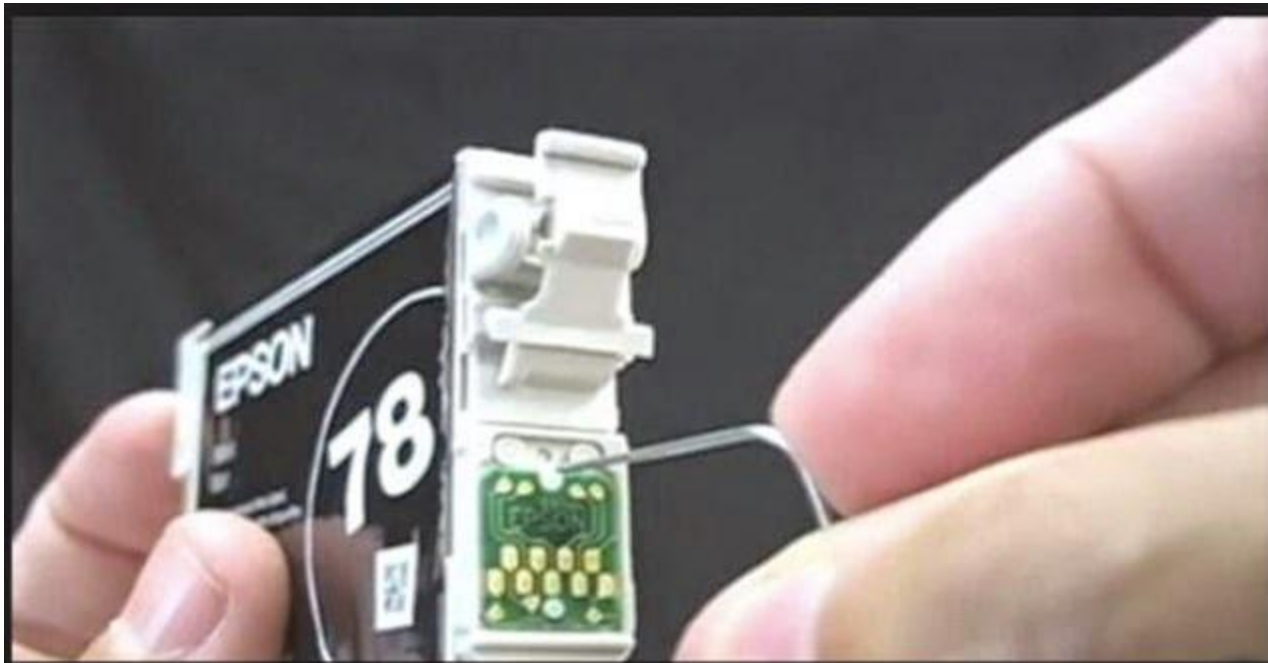

You're supposed to use staple removers to open key rings, not destroy your nails trying to do that.

Did You Know to Do This?

You're supposed to use the hole in the pot handle to hold your spoon.

Did You Know to Do This?

You're supposed to use a paper clip to pop the reset button on the ink cartridge when the computer says you're out of ink. It's like an extra amount for emergency printing.

Did You Know to Do This?

You're supposed to pull the sides of the juice box out so that your kids can hold onto them and keep the juice from spilling.

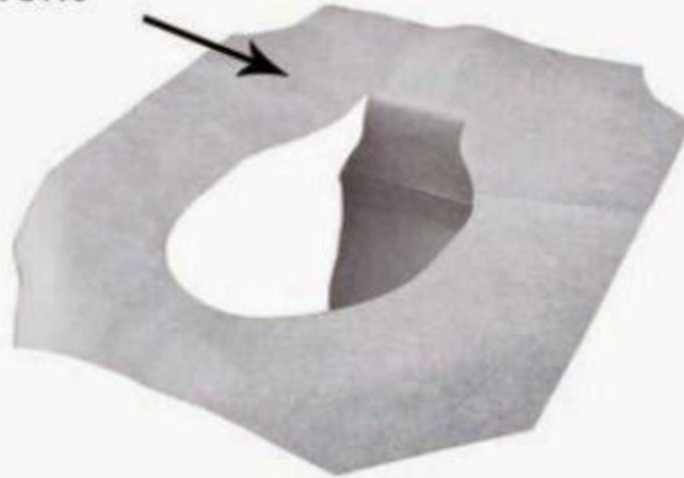

Did You Know to Do This?

You're supposed to use a flange plunger for your toilet and a cup plunger for your sink. You just use the cup plunger for both, don't you?

Did You Know to Do This?

Flap in front

You're supposed to place the flap of toilet seat covers in the front, not in the back (if you still don't know why, the keyword is

Did You Know to Do This?

You're supposed to fold the Greek yogurt container in half to pour out the topping.

Did You Know to Do This?

You're supposed to use your Chinese takeout container as a plate.

Did You Know to Do This?

You're supposed to use only a dab of toothpaste. And you're not supposed to rinse after you brush!

Did You Know to Do This?

You're supposed to lay a wooden spoon over the top of a your pots to prevent spillover when things boil. The wooden spoon can take more heat than its plastic counterparts and it pops the steam bubbles.
